

FASANARA CAPITAL *Attractive Global Opportunities*

Multi-strategy & multi-asset. *The Fund's investment objective is to achieve consistent, absolute returns with lower volatility by pursuing a multi-strategy & multi-asset mandate coupled with a tail risk hedging dimension. To achieve its objectives, the Fund invests across a number of asset classes including debt and money market instruments, credit, equity and currencies. While fundamental bottom-up analysis represents a core component of the strategy, top-down macro views are taken into great consideration, as they often influence the implementation of the bottom-up investment ideas. In addition, the Fund incorporates a tail hedging dimension aimed at protecting the overall portfolio against low probability, but potentially high impact systemic events.*

Why Invest?

- › **Turn-key Solution For A Dynamic And Research Driven, Alternative Multi-strategy Portfolio Exposure**
- › **Unconstrained Global Mandate With A Strong European Focus** *Combining top-down macro views with fundamental, bottom-up analysis*
- › **Potential Downside Protection** *Tail risk dimension added to the portfolio to protect and benefit against low probability, but potentially high impact macro events*
- › **Risk / Return Profile** *The fund seeks to provide a risk / return profile similar to that of hedge funds, but with lower investment minimums, greater transparency and daily liquidity*
